

# WHY DRINK HEALTHY ALKALINE + MINERAL WATER?

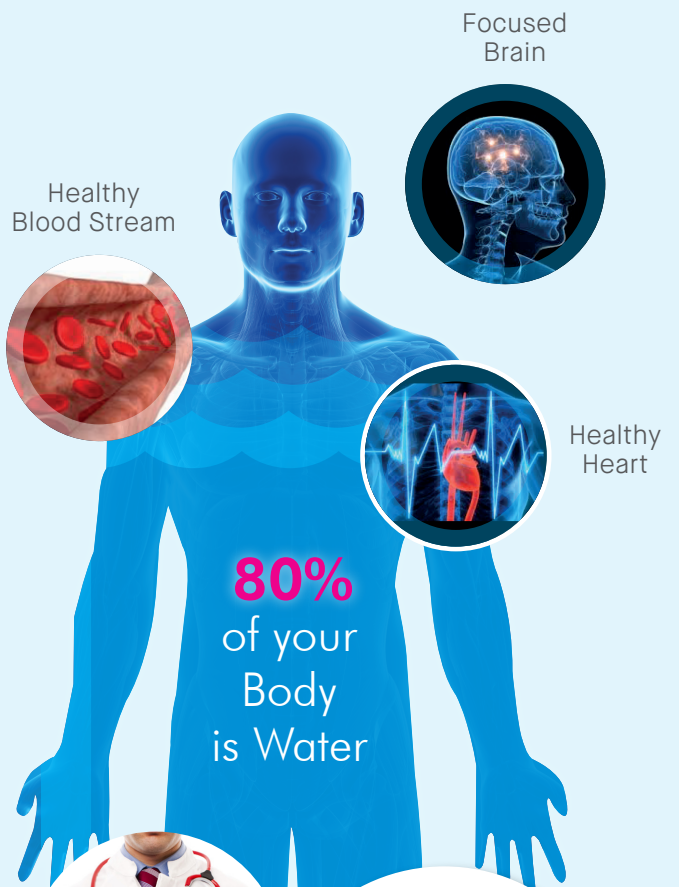

## PUTS BACK ESSENTIAL MINERALS

Produces perfectly pH-balanced alkaline water, helps minimise the fluctuations of your body's pH.

Returns essential minerals and alkalizers into your water - the natural calcium, magnesium, sodium, potassium ions can be absorbed fully by the body, assisting in hydration and recovery

Ordinary tap, filtered and bottled water consists of clusters of 10-30 H<sub>2</sub>O molecules. Great Water's systems combined micro-filtration and bioenergisation takes water to a new level, by producing much smaller water molecular clusters (5 to 6 water molecules). The low molecular weight of Great Water rapidly permeates the body - Moving through cell walls quickly and more efficiently, hydrating cells and flushing out toxins much more effectively.

### CALCIUM

- Prevents Osteoporosis
- Positive effects on metabolism to help keep you slim and trim
- Regulates hormones, reduces triggers of PMS
- Healthy antioxidants - preventative of cancer

### MAGNESIUM

- Stay energised, Responsible for enzyme-activated biochemical reactions in the body
- Regulates blood pressure, heart rate & blood sugar levels, maintaining nerve function and keeping muscles relaxed
- Critical "calming" mineral, potent in its ability to alleviate stress.

### POTASSIUM

- Regulates and balances the body's vital functions - particularly the heart
- Along with Calcium has been proven successful at lowering blood pressure and risk of stroke

Healthy Heart,  
Low pressure

Feel Vibrant,  
Negate Headaches  
and Lethargy

Pure Water for  
Formulas,  
Cooking, Teas  
and Coffees

Low  
Cholesterol

Reduce  
Diabetes Risk,  
Cancer Risk

Weight  
Loss

Healthy Skin,  
Muscle Tone  
and Teeth
